Dial up connection instructions

The following page is provided by the telecom company which provides the FREECALL service for VillaDirect managed homes. Owners wanting to use Dial up access from their computer through the FREECALL (Navis) phone system should follow the attached instructions.

Please note that VillaDirect is (regrettably) unable to provide further help or assistance to owners accessing the internet through the FREECALL service, as the company does not provide IT support to clients.

Kind regards

The VillaDirect Team

Internet Access

DIAL-UP Configuration

Windows XP	Windows 2000	Windows 98
Go to Network Connections	Go to Network and Dial-up Connections	Go to Dial-up Networking
<ol style="list-style-type: none"> 1. Click on 'Start', 'All Programs' 'Accessories', 'Communications' 2. Select 'Network Connections' 	<ol style="list-style-type: none"> 1. Click on 'Start', 'Programs' 'Accessories', 'Communications' 2. Select 'Network and Dial-up Connections' 	<ol style="list-style-type: none"> 1. Click on 'Start', 'Programs' 'Accessories', 'Communications' 2. Select 'Dial-up Networking'
